1 First section of manual

Text.

The code

```
1 \( *code \)
2 \LdfInit{croatian}\captionscroatian
```

When this file is read as an option, i.e. by the \usepackage command, croatian could be an 'unknown' language in which case we have to make it known. So we check for the existence of \l@croatian to see whether we have to do something here.

3 \ifx\l@croatian\@undefined

- 4 \@nopatterns{Croatian}
- 5 \adddialect\l@croatian0\fi

Hyphenation parameters are explicitly set.¹

6 \providehyphenmins{croatian}{22}

\captionscroatian

The macro \captionscroatian defines all strings used in the four standard document classes provided with \LaTeX . (Note that Unicode digraphs 1j (U+01C9) and nj (U+01CC) are explicitly used.)

```
7 \StartBabelCommands*{croatian}{captions}
   [unicode, charset=utf8, fontenc=EU1 EU2]
   \SetString{\prefacename}{Predgovor}
   \SetString{\refname}{Literatura}
10
   \SetString{\abstractname}{Sažetak}
   \SetString{\bibname}{Bibliografija}
   \SetString{\chaptername}{Poglavlje}
   \SetString{\appendixname}{Dodatak}
15
   \SetString{\contentsname}{Sadržaj}

67 \EndBabelCommands
```

\extrascroatian \noextrascroatian

The macro \extrascroatian will perform all the extra definitions needed for the Croatian language. The macro \noextrascroatian is used to cancel the actions of \extrascroatian.

For Croatian texts French spacing is switched on.² Respective pre-Croatian state is stored before that, and restored when Croatian is unselected.

```
68 \addto\extrascroatian{%
69 \newif\ifbbl@fs@precroatian\bbl@fs@precroatianfalse
70 \ifnum\the\sfcode`\.=\@m
71 \bbl@fs@precroatiantrue
72 \fi
73 \bbl@frenchspacing}
74 \addto\noextrascroatian{%
75 \ifbbl@fs@precroatian\bbl@frenchspacing\else\bbl@nonfrenchspacing\fi}
76 \ldf@finish{croatian}
77 \(/code\)
```

²Recommendation from Damir Bralić
